# The fastest way to extend the reach of your enterprise

Low-cost, highly secure, rapid-deployment software solution for enterprise mobility for your existing legacy and bespoke systems.

[Book a demo](#)
[Learn more](#)

## Trusted by

LEADING MOBILE ACCESS SOFTWARE

## No need to upgrade your applications

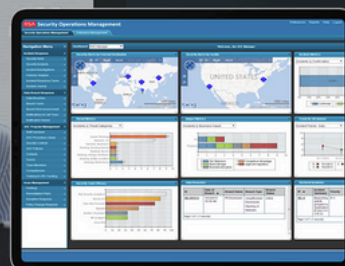

2GoCloud's software works with what you have now, regardless of your enterprise applications, including legacy and bespoke systems.

### Unique approach

2GoCloud gives users full control over all aspects of their enterprise applications – without cutting a single line of code

### Fast & secure deployment

Implementation time is measured in days or even hours rather than weeks or months. No data is stored on the device and we do not see customer data.

[Explore the solution](#)

## How 2GoCloud software works on your applications

Satisfies even the most critical of security requirements.

### Your applications

Interactions between the user & the streamed information are delivered to the device from the dedicated 2Go server, which is used to connect to your source applications

### 2Go server

All communication between the client device and the 2Go server is secured through encryption via Federal Information Processing Standard (FIPS) 140-2

### User's device

Our software architecture does not allow the user to store data locally or access local devices, such as printers or removal storage (e.g. USB devices) as all data remains in your data centre

INDUSTRY EXCELLENCE

## Proven track record across enterprise sectors

### Energy & Utilities

Capture live data and notes on site – perfect for field engineers

### Healthcare

With no data stored on the device, you can be confident that patient confidentiality is secure

### Defence

Bring a number of benefits to the defence industry

### Government

Rapidly bring the benefits of mobile working to all your civil servants

### Manufacturing

Full strength ERP solutions on mobile – not just point specific tasks apps

### Shipping & Logistics

Get instant updates on from your core systems wherever you are without having to go back to the office

[Learn more](#)

## Universal access software layer technology

For any organisation who has enterprise-class applications such as SAP, Oracle, Microsoft etc. (or a mix of multiple vendors, bespoke or legacy systems & more) and need to succeed fast in a mobile first world.

[Book a demo](#)

### Adapt mobility in days

Extend the reach of your enterprise applications out to your remote workforce and mobilise your business applications and users in days with no code

### Fully data secure

Use current systems securely with no need to upgrade. 2GoCloud software provides a fully data secure solution with no local device storage and works with even legacy applications

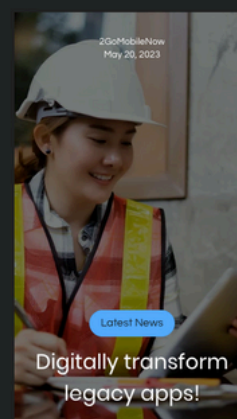

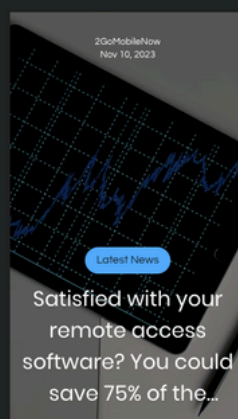

### No code required

Mobilising existing enterprise applications with no code. The 2GoCloud software works on a variety of devices including Apple and Android mobiles and tablets, as well as Chromebooks and laptops with no need for app development

### Remote operations

2GoCloud enables you to work directly with your enterprise systems in precisely the same manner as you would on your office desktop or laptop but through 2GoCloud on your mobile device. Putting information in the hands of those who need it.

ENABLING GLOBAL HEALTH CARE

## Trusted to deliver, time and time again

Providing a secure, easy to implement solution which empowers healthcare staff to work effectively with any and all of the applications they need to ensure patient care, 2GoCloud works via a technology structure which ensures that each user's "session" remains discrete and unable to be accessed by anyone other than the authorised user.

Coupled with the fact that "no data is stored on the device" ensures that patient confidentiality is protected at all times but delivering up-to-the-minute data to all those practitioners who need it.

Whether you're operating in primary care, secondary care, community health, social services or mental health providers then the 2GoCloud solution can help you to improve productivity, save time and help treat more patients with the same resource.

# Defence

2GoCloud gives you the advantage in defence operations with real-time, secure, agile and adaptable access to your digital platforms.

[Book a demo](#)
[Learn more](#)

## Key benefits:

- 1 Improved mobility**  
 Operating in remote locations often poses challenges for personnel in accessing critical data and systems. 2GoCloud facilitates access to enterprise applications from any location using mobile devices, including BYOD, enabling efficient task performance on the move.
- 2 Increased flexibility**  
 Personnel can seamlessly access multiple enterprise applications from different locations, providing a unified platform regardless of the device or operating system. This heightened flexibility empowers personnel to work effectively with 2GoCloud, irrespective of their physical location.
- 3 Enhanced security**  
 2GoCloud prioritises security through advanced encryption and secure authentication protocols without storing any data on the device, ensuring only authorised personnel can access critical enterprise applications.
- 4 Improved collaboration**  
 The seamless platform provided by 2GoCloud facilitates real-time collaboration, enhancing teamwork and communication. Personnel can operate more effectively together, even when physically remote.

## Why is 2GoCloud the go-to for defence personnel?

Fully secure & complies with defence standards

Rapid deployment

No code required

Remote users

Mobile, tablet & desktop

Enables secure BYOD (Bring Your Own Device) use

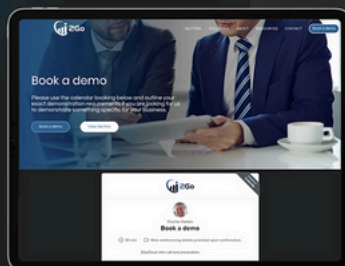

[Book a demo](#)

# Designed to empower defence personnel

The defence community relies on secure communication and data exchange across its services, military units, bases, and agencies, especially in the realm of military software development.

2GoCloud offers secure mobile access to critical business applications without the need for discrete mobile apps. It enables users to access both modern cloud-based and legacy applications efficiently, regardless of vendor or age. 2GoCloud empowers defence personnel with secure global data access and capture enhancing operational efficiency and situational awareness, crucial for military operations.

2GoCloud ensures enhanced security, collaboration, and cost-effectiveness.

## Healthcare

2GoCloud can bring a number of benefits to the NHS and other healthcare organisations.

[Book a demo](#)
[Learn more](#)

## Enterprise application mobility solutions for healthcare professionals

2GoCloud, our "Universal Mobile Access" technology, enables NHS organisations to provide full access on mobile devices to ALL of their applications, e.g. PAS, EPR, HCM, LIMS, BI etc. on the move, regardless of vendor or development technology- all **within one app** and without re-engineering, re-design, re-development or re-training while remaining **fully data secure**.

1

### Problem solved

Many organisations with multiple systems in use struggle to provide secure, rapid, efficient mobile use of these systems to users. The typical approach is to develop task specific mobile apps at a high cost and with long time delays or struggle to work with remote desktop systems which were not optimally designed for use with mobile devices.

2GoCloud is secure, fast and inexpensive while enabling ALL enterprise level applications to be used without any re-engineering of systems or content, whether or not the application has been designed for use on the mobile device and without users having to struggle with an unfamiliar interface.

2

### Significantly lower costs

2GoCloud licensing is based upon a simple annual in advance subscription plan on fixed-term contracts or, if preferred, can be priced as a Capex purchase.

Typically saving clients over 75% of the Total Cost of Ownership of other mobile development approaches, 2GoCloud is an affordable solution which can dramatically improve the Return On Investment in existing healthcare software applications by extending their life whilst allowing their use in a remote working context.

3

### Unique selling position

2GoCloud is a unique approach to the problem of enabling mobile remote working by providing users with a "mobility layer" which can "float" on top of their existing systems enabling them to be accessed from mobile devices.

Unlike other 'point-specific' mobile apps or remote access systems, forcing Windows browser experiences on mobile users, 2GoCloud provides a fully functional, bi-directional, secure system where no data is stored on the device yet remains fully productive.

# Why is 2GoCloud the go-to for Healthcare Software?

Fully secure & complies with healthcare standards

Rapid deployment

No code required

Remote users

Mobile, tablet & desktop

Enables secure BYOD (Bring Your Own Device) use

DISCOVER HOW 2GO COULD SAVE YOUR BUSINESS MONEY

## Find out how deploying 2GoCloud could improve NHS efficiency and help to reduce waiting list times

[Read more](#)[Book a demo](#)

### How quickly can we put 2GoCloud into effect?

We stand ready to provide an immediate response to demands from the NHS to deliver mobile access to underlying solutions within days.

### How does 2GoCloud achieve this?

Users can download the 2Go client app onto either iOS or Android-based mobile devices right now free of cost. At the same time, we work with the IT team to connect and configure the underlying systems to our 2Go servers.

### Why partner with 2GoCloud?

2GoCloud is a unique approach to the problem by providing users with a "mobility layer" which 'floats' on top of their existing systems enabling them to be accessed from mobile devices. 2GoCloud provides a fully functional, bi-directional, secure system where no data is stored on the device yet users remain fully productive.

## Utilities

2GoCloud can bring a number of benefits to the utilities sector.

[Book a demo](#)
[Learn more](#)

## Designed to empower the utility sector

2GoCloud, our "Universal Mobile Access" solution can bring substantial improvements in working within the Utilities sector whether in wind or water, oil or gas, nuclear or power – in fact any part of the sector where the ability to work on a single device with multiple applications both SaaS enabled and legacy "thick client" at your fingertips can be a major advantage.

Designed to provide a simple to use but highly intuitive native User Interface rather than a clumsy web browser, the 2Go app can put literally ANY and ALL of the applications your staff need to be able to use in the field to do their job available to them via a "single pane of glass" approach.

Icon driven and running in "sessions", each application can be readily selected by tapping on the relevant product icon and you can be up and running immediately in a secure environment where all work product remains on the application servers and no data is stored on the device. Need to quickly switch tasks – this is easy as selecting another icon, which "freezes" your original application session at that point as the new application fires up and results in a new "thumbnail" icon being added to the History view. Once done with the new application, tapping on the previous thumbnail "freezes" the current session and "unfreezes" the previous one, dropping you back exactly where you left off to continue your work.

Busy engineers with both hands full can order those missing spare parts directly from their "back office" systems through the "tap n' talk" capability built into the 2Go app which allows voice recognition based data capture to be recorded directly into the underlying system without the need to type – this is not only faster but also more accurate than most engineer's typing skills.

## Why is 2GoCloud the go-to for the utility sector?

[Book a demo](#)
[Learn more](#)

## Remote operations

If your organisation is struggling to improve the efficiency of remote operations and/or struggling with the significant costs involved with some of the popular remote access solutions, then you really need to take a look at 2GoCloud.

With the ability to deliver any and all of the applications your remote operators need access to, at the top of a finger and yet ensure full security of data – no data is stored on the device! – 2GoCloud works across a variety of devices ranging from laptops through smartphones.

Whether your team are working with the latest SaaS enabled applications but struggling with how to use these efficiently on mobile devices or are dependent upon accessing legacy but crucial systems which were never envisioned as being used on mobile devices, then the 2Go app gives them the freedom to work wherever and whenever they wish.

## Why is 2GoCloud the go-to for remote operations?

## Solutions

Enable rapid and secure mobile access to critical business information, with speedy implementation and low cost.

[Book a demo](#)[Learn more](#)

## What we offer

Speed, security & cost reduction is at the core of what we do

### Fast & easy

2GoCloud is quick & easy to install and operate. Clients can be up and running in days not weeks or months

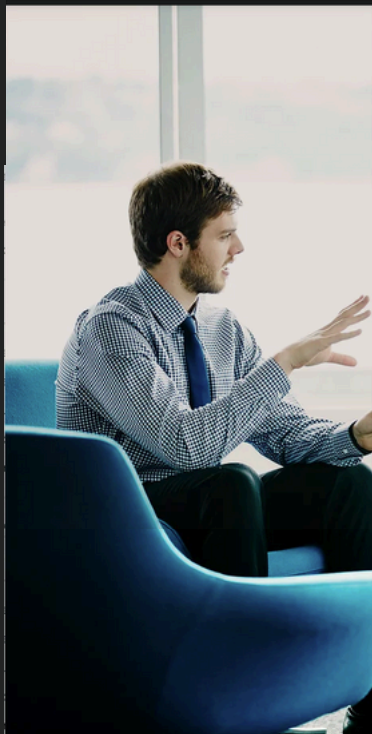

### Secure

No data is stored on your devices, meaning your organisation's data is safe within existing control and policies

### Inexpensive

Significantly lower Total Cost of Ownership than building your own mobile application

## How do 2GoCloud solutions work?

2GoCloud solutions can use existing gateway connections and can also incorporate VPN connections if that is desired/required.

From there, the 2Go server does the heavy lifting of delivering, on demand, the content from your server to a format that can be viewed and interacted with on your mobile device.

For the user, they can now securely view and interact with all the content they are familiar with. Filling out forms, creating reports, and reviewing critical data is now all available on their mobile device with unique 2GoCloud user features.

### Voice dictation & more

Make appropriate use of device attributes, including voice, touch, sound and location

### Custom keyboards

Provide the facility to support custom keyboards incorporating Control and Function keys

### Custom gestures

Allow for user-definable, user-selectable gestures

### Dynamic navigation

Provides for simple but intuitive end-user navigation of content

[Book a demo](#)

### Non-invasive

2GoCloud requires no change in the operation or coding of any supported enterprise application

### Rapid implementation

Should need no more than a few days to install and configure the necessary components to have a fully operational system

### Comprehensive coverage

Enable systems from a mix of vendors, including in-house bespoke development solutions to be used without specific development or effort

#### Remote users

Putting information in the hands of those who need it

#### No development

No need to develop any mobile apps

#### Increase productivity

Capture critical information on site

#### Connected on the move

Work more effectively on your mobile than on your laptop

[Book a demo](#)

## Our story

Three partners, proven track record, and award-winning.

The three founding partners behind iNovar started with the creation of the groundbreaking MyBI solution, which was named 'Cool Vendor of the Year 2012 for Business Analytics' by Gartner, and MassChallenge 2015, Wolves Summit 2016 and featured Finalist at the White Bull 2016.

David Monks, the current CEO of iNovar, has 40 years experience of the IT industry and through his business development experience has already brought the international team awards, which celebrate the innovation iNovar are delivering through 2GoCloud.

### Our vision

Results through Innovation – delivering secure fully functional enterprise applications on a range of devices, including mobile, without re-engineering!

### Our mission

Our motto is "results through Innovation", and to succeed and keep that innovation flowing we must have: the vision; the clarity of intent; the strategy; the resources; a contingency plan; integrity in our convictions and passion in our resolve.

# Testimonials

See a selection of testimonials from our clients across the world.

I'm delighted to welcome Inovar into the Atos Horizons programme. Their innovative 2Go mobility offering in the Digital Workplace arena is incredibly relevant to the hybrid workplace where new working models need to be deployed rapidly and without the need for all of the application re-engineering effort traditionally involved. Exploiting this technology enables our customers to deliver and receive information via their existing application portfolios in the field easily and intuitively using standard mobile devices and features.

## FAQ's

We have answers to all your questions, take a look at our FAQ's below.

[Book a demo](#)
[View sectors](#)

## Frequently asked questions

[Setting up](#) [Getting Started](#) [Your Apps and Your Data](#)

### What is 2GoCloud?

2GoCloud is a Universal Mobile Access approach using an Enterprise Applications Mobility Layer technology - which means that it is intended to be used in conjunction with enterprise applications such as ERP, CRM, HCM, SCM etc. As well as with Business Intelligence and Analytics applications and provides a "layer" to sit on top of the existing applications enabling them to be used with a wide range of devices including mobiles.

### What applications does 2GoCloud work with?

There is a substantial list of enterprise applications which we have already worked with - including those from the major vendors such as SAP, Oracle and Microsoft as well as some specific vendors such as ServiceNow, Remedy and Workday - so we may already have all the information we need to connect to your enterprise applications. The full list can be accessed [here](#).

### How secure is 2GoCloud?

Very! You need to understand one fundamental point about the 2GoCloud approach, which is "there is no data on the device"

What this means is that the 2Go client does not allow a user to store anything locally on the device - or even to local storage connected to the device - as everything is stored back on the company's central servers.

The communications between the remote 2Go servers and the 2Go app on your device are fully encrypted to Federal Information Processing Standard 140.2 (otherwise known as FIPS140.2) and as such are equivalent to the security in your mobile banking app.

When you further understand that what is being communicated is a seemingly random sequence of pixels with no reference point contained within the stream, you'll appreciate just how secure this system is!

### Do I need to go on a training course to use 2GoCloud?

Absolutely Not! The whole approach of 2Go is to provide you with an unobtrusive but an intuitive means of navigating around the applications you use every day, including an easy to use system to create and manage your own list of favourite applications. I can reassure you that you'll be up and running in moments as if you've used 2GoCloud forever!

### Will I need to learn a new interface to do what I already know how to do?

Absolutely not! 2GoCloud presents you with the familiar user interface of your applications in full-screen mode on the mobile device of your choice and automatically adjusts for the resolution of the device. If you need a better view, then you can "pinch and zoom" to allow you to zoom in as close as you like or "spread and zoom" to enable you to zoom out back to the maximum resolution, effortlessly.

However, these are just some of the over 100 custom gestures built into the 2Go user interface and as you gain more experience in using some of these gestures you should find that you'll get a lot more done in the same amount of time!

The keyboard processing feature allows for the use of multiple keyboards, allowing users to effortlessly switch between different language layouts when necessary—though it's admittedly a rare need! It's important to highlight that this functionality isn't limited to standard keyboard layouts; it can be customized, such as configuring it to display only six large keys labeled 1 through 6 on the screen. These keys can then be programmed to send specific code sequences to an underlying application.

### I've heard that 2GoCloud works with voice recognition - can you explain?

With the rise in the functionality of the voice recognition systems built into today's modern mobile devices such as Apple's Siri or Android's Voice, it is now practical to talk directly into your enterprise applications! The approach used leverages the voice recognition engine built into your mobile device to pass converted text from the voice recognition system via the 2GoCloud encryption system to the very heart of your applications. Ideal for those field workers who often have both hands in use already and who want to capture notes directly into their ERP system for example.

# Frequently asked questions

Setting up   **Getting Started**   Your Apps and Your Data

## What is involved in a 2GoCloud implementation?

There are a number of options which you can consider when deploying 2GoCloud, amongst them being whether or not to use our network of 2Go servers stood up within the Amazon Web Services environment around the globe, or to have one or more 2Go servers stood up within your private cloud environment or even, as one of our clients has done, to have the 2Go server software installed within their own data centres. At its' core, however, 2GoCloud implementation needs a suitably sized server – this can be a physical or a virtual server running Windows 2019 operating software as a minimum – upon which the 2Go server software is installed and the availability of at least one mobile device – it can be a smartphone or a tablet and versions are available for both Apple and Android – to download and install the 2Go client app. Once both elements of the software are successfully installed, all that is required is some limited configuration work, and you will be able to use your enterprise application on your mobile device – it's that straightforward!

## How quickly can 2GoCloud be set up?

This is a function of what you wish to use 2GoCloud to do. At the simplest level, if what you are seeking to produce is a mobile enabled version of a SaaS or web-enabled application, then we've been able to have this up and running in a matter of days – often within an hour! Even at the most sophisticated level requiring the use of specific VPN's to connect to installing "thick" clients, we've been able to get these up and running in a matter of weeks rather than months. Contact our team, and we'll happily explain what is involved. Alternatively, you can download 2Go onto any Apple or Android device.

## How much does it cost to use 2GoCloud?

Significantly less than you may be expecting! The answer is dependent upon your organisation's preference for how it wishes to pay for 2GoCloud as this can range from licensing a user (the default system BUT with the ability for that same user to have up to 5 devices in use before requiring another licence) all the way through to licensing by time spent connected to 2GoCloud! Our standard approach is to explain that we typically charge an annual access fee to cover being able to connect your free of charge 2Go app to a specific 2Go server – or group of 2Go servers – and this annual fee vary depending upon how many users your company needs and how long a contract you're happy to commit to (minimum 1 year). We are delighted to discuss openly any aspect of how you might wish to pay for 2GoCloud, so we would recommend that you get in touch!

Setting up   **Getting Started**   Your Apps and Your Data

## Will I notice anything different when using my applications through 2GoCloud?

The main difference will be the fact that you'll be able to use the underlying application directly from your mobile device – we're not talking about having a limited functionality, "task-specific" mobile app developed for only a small part of the system, but a fully functional access to all of the relevant parts of the application you are used to using – all within the one app!

One thing you may notice is that 2GoCloud enables you to use the underlying application within a "session" – in other words, when you open the app your session starts and should you wish to switch to another application, e.g. Excel to do some calculations or Word to make some notes, your session will "freeze" the then current status of the underlying application and create a thumbnail snapshot icon to represent your work. Once you've finished with the other application and touchback on the snapshot, 2Go "unfreezes" your session and you're back where you left off.

## What is involved in having 2GoCloud connect to a new application?

Unlike applications already within our configuration library, an application which is new to 2Go does require some configuration before it can be used. The amount of information and the method of connection used depends upon whether the application is web-enabled or not. In the case of web-enabled applications, all that is required is the URL and any specific port numbers used to access, and you'll be mobile in moments! Other applications, such as those which require the installation of a "thick" client to access the system takes a little more effort, but this is typically only a matter of installing the client on the 2Go server and answering a few questions about security settings etc. And again, you'll be mobile in a few more moments!

## Does 2GoCloud transform my old applications into new ones?

No. We do not "transform" anything in the sense of making it look or work differently as this is one of the great things about 2GoCloud – it enables you to work in the same familiar way you work on your laptop or desktop when you're in the office.

While there are a number of companies who claim that they can create mobile versions of your applications and so transform the old ones, these typically require significant investments of time, effort and money to run.

## How will I know whether I can use a specific application through the 2Go app?

This is set up by your administrator with a very straightforward process which will ensure that when you fire up 2Go, you will be able to scroll through a display of icons representing the applications you have access to. If the one you want is not visible, then check with your administrator to get this added – if you have the rights to do so!

## How about if I decide to stop using 2GoCloud? Will my applications work?

Absolutely! However, of course, they will be no longer accessible via your mobile device. 2GoCloud makes no changes to the underlying applications – remember it is a "layer" approach – so your applications will continue to work exactly as they did before you implemented 2GoCloud.

HOW COULD IT WORK FOR YOUR BUSINESS?

## Book a demo

Experience the full potential of 2GoCloud with a personalised demo tailored to your business needs. Our team will conduct a pre-validation discussion to understand your unique requirements, ensuring a customised approach that aligns with your goals and business needs.

# Privacy & Cookie Policy

## Who we are

<https://2gocloud.com>

### (1) what information do we collect?

We may collect, store and use the following kinds of personal data:

- (a) information about your visits to and use of this website;
- (b) information about any transactions carried out between you and us on or about this website, including information relating to any purchases you make of our goods or services;
- (c) information that you provide to us via telephone or this website to register with us and/or subscribing to our website services and/or email notifications
- (d) we may record your telephone calls for training and quality purposes and to ensure we offer a high quality of customer service.

### (2) information about website visits

We may collect information about your computer and your visits to this website such as your IP address, geographical location, browser type, referral source, length of visit and number of page views. We may use this information in the administration of this website, to improve the website's usability, and for marketing purposes.

We use cookies on this website. A cookie is a text file sent by a web server to a web browser and stored by the browser. The text file is then sent back to the server each time the browser requests a page from the server. This enables the webserver to identify and track the web browser.

We may send a cookie which may be stored on by your browser on your computer's hard drive. We may use the information we obtain from the cookie in the administration of this website, to improve the website's usability and for marketing purposes. We may also use that information to recognise your computer when you visit our website and to personalise our website for you.

Most browsers allow you to refuse to accept cookies. (for example, in internet explorer you can refuse all cookie by clicking "Tools", "Internet Options", "Privacy", and selecting "Block all cookies" using the sliding selector.) This will, however, have a negative impact upon the usability of many websites, including this one.

We also include web beacons (also known as clear gifs) in our emails to track the success of our marketing campaigns. This means that if you open an email from us, we can see which pages of the sites you visit. Our web beacons do not store additional information on your computer but, by communicating with our cookies on your computer, they can tell us when you have opened our email. If you object to web beacons, we recommend you follow the instructions for deleting existing cookies and disabling future cookies above. We will still know how many of our emails are opened and we will automatically receive your ip address, a unique identifier of your computer or other access devices; but we will not identify you as an individual.

### (3) using your personal data

Personal data submitted on this website will be used for the purposes specified in this privacy policy or relevant parts of the website.

In addition to the uses identified elsewhere in this privacy policy, we may use your personal information to

- (a) improve your browsing experience by personalising the website;
- (b) send information to you which we think may be of interest to you by post or by email or similar technology;
- (c) send to you marketing communications relating to our business (or the businesses of carefully-selected third parties) which we think may be of interest to you by post or, where you have specifically agreed to this, by email or similar technology (you can inform us at any time if you no longer require marketing communications to be sent by emailing us at [info@2gomobilenow.com](mailto:info@2gomobilenow.com))
- (d) provide other companies with statistical information about our users – but this information will not be used to identify any individual user.

### (4) other disclosures in addition to the disclosures reasonably necessary for the purposes identified elsewhere in this privacy policy, we may disclose information about you:

- (a) to the extent that we are required to do so by law;
- (b) in connection with any legal proceedings or prospective legal proceedings;
- (c) to establish, exercise or defend our legal rights (including providing information to others for fraud prevention and reducing credit risk); and
- (d) to the purchaser or seller (or prospective purchaser or seller) of any business or asset which we are (or are contemplating) selling or purchasing.

Except as provided in this privacy policy, we will not provide your information to third parties.

### (5) security of your personal data

We will take reasonable precautions to prevent the loss, misuse or alteration of your personal information. Of course, data transmission over the internet is inherently insecure, and we cannot guarantee the security of data sent over the internet. We will store all the personal information you provide on our secure servers.

### (6) policy amendments

We may update this privacy policy from time-to-time by posting a new version on our website. You should check this page occasionally to ensure you are happy with any changes.

### (7) your rights

You may instruct us to provide you with any personal information we hold about you. Provision of such information may be subject to the payment of a fee.

You may instruct us not to process your personal data for marketing purposes. In practice, you will usually either expressly agree in advance to our use of your personal data for marketing purposes, or we will provide you with an opportunity to opt-out of the use of your personal data for marketing purposes. You can also instruct us not to use your personal data for marketing purposes by email (to [info@2gomobilenow.com](mailto:info@2gomobilenow.com)) at any time.

### (8) third party websites

The website contains, or may from time to time contain, links to other websites. We are not responsible for the privacy policies of third party websites or their content.

### (9) contact

If you have any questions about this privacy policy or our treatment of your personal data, please write to us by email to [info@2gomobilenow.com](mailto:info@2gomobilenow.com) or by post to iNovar EMEA Limited, Cedars Cottage, The Close, Sway, Lymington, Hants, SO41 6ED, UK

#### (10) Art 27 EU GDPR representative

##### Representation for data subjects in the EU

We value your privacy and your rights as a data subject and have therefore appointed Prighter as our privacy representative and your point of contact.

Prighter gives you an easy way to exercise your privacy-related rights (e.g. requests to access or erase personal data). If you want to contact us via our representative Prighter or make use of your data subject rights, please visit: <https://prighter.com/q/19894847655>

# Terms & Conditions

Welcome to our website <https://2gomobilenow.com>. If you continue to browse and use this website, you are agreeing to comply with and be bound by the following terms and conditions of use, which together with our [privacy policy](#) govern iNovar EMEA Limited relationship with you in relation to this website. If you disagree with any part of these terms and conditions, please do not use our website.

The term 'iNovar EMEA Limited' or 'iNovar' or '2Go' or 'us' or 'we' refers to the owner of the website whose registered office is Cedars Cottage, The Close, Sway, Lymington, Hants., SO41 6ED, UK. Our company registration number is 08337440 The term 'you' refers to the user or viewer of our website.

The use of this website is subject to the following terms of use:

- The content of the pages of this website is for your general information and use only. It is subject to change without notice.
- This website uses cookies to monitor browsing preferences. If you do allow cookies to be used, the following personal information may be stored by us for use by third parties: [insert list of information].
- Neither we nor any third parties provide any warranty or guarantee as to the accuracy, timeliness, performance, completeness or suitability of the information and materials found or offered on this website for any particular purpose. You acknowledge that such information and materials may contain inaccuracies or errors and we expressly exclude liability for any such inaccuracies or errors to the fullest extent permitted by law.
- Your use of any information or materials on this website is entirely at your own risk, for which we shall not be liable. It shall be your own responsibility to ensure that any products, services or information available through this website meet your specific requirements.
- This website contains material which is owned by or licensed to us. This material includes, but is not limited to, the design, layout, look, appearance and graphics. Reproduction is prohibited other than in accordance with the copyright notice, which forms part of these terms and conditions.
- All trademarks reproduced in this website, which are not the property of, or licensed to the operator, are acknowledged on the website.
- Unauthorised use of this website may give rise to a claim for damages and/or be a criminal offence.
- From time to time, this website may also include links to other websites. These links are provided for your convenience to provide further information. They do not signify that we endorse the website(s). We have no responsibility for the content of the linked website(s).
- Your use of this website and any dispute arising out of such use of the website is subject to the laws of England, Northern Ireland, Scotland and Wales.
